

In re MOURA et al. ---Appln. No. 08/697,080

Suppression may be achieved logically without the use of queues, by queuing in software or in memory, by discarding before queuing or by other means of suppression.

No new matter is believed to have been added by the amendment.

The inventions remain patentable, in part, at least for some of the reasons set forth in our response of June 6, 1997.

We authorize charges for additional claims fees (three independent claims and three dependent (total now being 19 claims)) to Farkas & Manelli deposit account no. 060115.

Respectfully submitted,
FARKAS & MANELLI, PLLC
